Introduction

Package contents

1. Intense PC computer
2. 12V DC power supply
3. AC cord. Standard North-American plug *
4. HDMI to DVI adapter
5. 3.5mm to RCA cable for S/PDIF
6. 2 WiFi antennas (in some models)

To use Intense PC, you will need:
- A display with DVI, HDMI or DisplayPort input + DVI, HDMI or DisplayPort cable
- USB keyboard and mouse

* Local resellers may supply Intense PC with other AC cord types.
Intense PC features

Front panel
The features of the front panel of Intense PC depend on specific FACE Module used and are documented separately.

Power
Intense PC has a tactile power push-button. It is used for turning on/off the PC and for standby/resume when supported by the operating system.
A push of at least 5 seconds will always turn off the Intense PC.

Display
Intense PC has dual display interface with support for dual head.
  1. Standard HDMI with audio support
  2. DisplayPort
To connect Intense PC to a DVI display, use the provided HDMI to DVI-D adapter. Use a DVI cable to connect the adapter to the display.
To connect Intense PC to a VGA display use fit-VGA (sold separately).

Audio
There are 2 standard 3.5mm jacks on the back panel.
Right:
  • Stereo line-in using a standard 3.5mm plug
  • S/PDIF 7.1 in using provided cable
Left:
  • Stereo line-out using a standard 3.5mm plug
  • S/PDIF 7.1 out using provided cable

LAN
Intense PC features two 10/100/1000BaseT Ethernet ports using standard RJ45 connectors. Use a standard Ethernet cables to connect.
The connectors feature built-in LEDs that are lit when a connection is detected.
WLAN
2 WLAN antennas are supplied in models with integrated WiFi and should be screwed into the standard SMA connectors.

USB
There are 2 USB 3.0 ports (5 Gbps) and 2 USB 2.0 ports on the back panel. 
All USB ports support current up to 1A. 
Ports on the back are upside down – note when connecting USB plugs. 
Depending on the FACE Module used - some models incorporate additional 4 USB 2.0 ports in the front.

Serial port
The RS232 mini-serial port is located on the back panel. 
Mini-serial to DB9 cable to connect to standard serial devices is sold separately.

eSATA
Intense PC features two eSATA ports. Ports are located on the back panel.
Quick start guide

Connecting Intense PC

- Turn off the display and connect it to the Intense PC HDMI connector (use the HDMI to DVI adapter if needed).
- Connect the USB keyboard and mouse to USB 2 connectors.
- Plug the Ethernet cable into the Ethernet connector.
- In Intense PC models with WiFi: Mount the WiFi Antennas on the SMA connector by turning it clockwise repeatedly until the antenna holds firm.
- Insert the DC plug into the Intense PC DC-in jack. Rotate clockwise 90° to secure.

![Diagram of Intense PC connections](image)

- Plug the speakers into the line-out jack.
- Connect the power supply to the AC cord and plug the cord into AC outlet. The front panel logo should light up as the Intense PC boots.

Booting Linux

Linux loads automatically on power up. Upon boot you will be guided through the Linux Mint first-boot setup procedure.

Booting Windows 7

Upon first power-up, you will be guided through the Windows Welcome procedure which is self-explanatory. The Windows 7 serial number is printed on the Windows 7 label on the bottom of your Intense PC.
Maintenance

Intense PC requires no maintenance. You should not take the Intense PC apart other than opening the service door. Taking Intense PC apart will void its warranty. The following operations can be conducted by the user:

Opening service door

1. Unscrew marked Philips screw at the bottom to release service-door.
2. Slide out service-door until it stops – about 10 mm.
3. Service-door is now detached. Lift edge of service-door to completely remove.

Re-assemble in reverse order. Hard disk connects by sliding-in the service-door.

Service bay

The service-bay provides easy access to hard-disk, RAM, and mini-PCIe sockets incl. WLAN module.

Hard disk is 2.5“ 9.5mm SATA. It is screwed to service door by 4 screws, 2 on each side. It is recommended to use 5400 RPM hard disk or SSD. 7200 RPM or higher is not recommended due to higher power consumption and risk of overheating.

RAM – use DDR3-1333 SO-DIMM modules.

Mini-PCIe – the half-size mini-PCIe is normally used for WLAN. If you remove the WLAN module make sure to isolate the ends of antenna cables with some tape to avoid short-circuit. The full-size mini PCIe is available for any use.
BIOS Setup Utility

Entering BIOS Setup Utility
Turn off the Intense PC.
Turn on while holding down the F2 key.

Bios Features

Warranty and RMA

Warranty
- CompuLab guarantees products against defects in workmanship and material for a period of 24 months from the date of shipment.
- Your sole remedy and CompuLab's sole liability shall be for CompuLab, at its sole discretion, to either repair or replace the defective product at no charge.
- This warranty is void if the product has been altered or damaged by accident, misuse or abuse.

RMA
Keep the original package for shipping in case of hardware failure.
In case of HW failure of an Intense PC under warranty, please contact the seller of that Intense PC.
Please provide the following required information:
- Intense PC serial number
- Name of purchaser
- Address
- Problem description

If the Intense PC was purchased directly from CompuLab, please email rma@fit-pc.com.

Tips for saving power

General
- Working without a connected display automatically disables the graphics controller – saving power.
- Disconnect external USB devices when not in use.

In Operating System
Use power scheme as follows
- Turn of monitor after several minutes not in use
- Turn off hard disk after several minutes not in use
- System standby after an hour not in use
