

fitlet-T – Compulab’s best price/performance fanless PC

Yokneam, Israel 18-Dec-2015 – Compulab is expanding the popular fitlet mini-PC product line with the new fitlet-T – the highest performance model in the fitlet family with a quad-core 2.4 GHz AMD GX-424CC APU.

fitlet-T is an embedded product with guaranteed longevity. Like all fitlet models carries 5 year warranty. It is available now at a price starting at \$386.

Performance and value

fitlet-T is 40% faster than fitlet-H, 15% faster than fit-PC4 Pro and 8% faster than IPC2 i3 (with Intel Core-i3 4010U). All results are based on Primate Labs Geekbench 3 benchmark.

“fitlet-T is the new price/performance leader in Compulab portfolio.” Said Irad Stavi, Chief Product Officer at Compulab. “It provides higher performance than the Core i3 based IPC2 yet priced 30% lower. For cost sensitive applications that require the reliability of a fanless system fitlet-T is an extremely attractive platform.”

fitlet-T specifications

CPU: AMD GX-424CC 64 bit / quad-core / up to 2.4 GHz / 25W TDP

RAM: Up to 16 GB DDR3L-1866 (2x SODIMM)

Storage: Internal 2.5” HDD/SSD + mSATA + micro-SD

Display: 2x HDMI 1.4a up to 2560 x 1600

Audio: S/PDIF 7.1 input/output + stereo line-out / MIC in

LAN: 2x Gbit Ethernet (Intel i211 Ethernet controllers)

WLAN: WLAN 802.11ac (2.4/5GHz dual band Intel 7260HMW) + Bluetooth 4.0

Cellular: mini-PCIe for cellular modem + on-board uSIM socket

USB: 2x USB3 + 6x USB2

Expansion: Full-size miniPCIe with mSATA + half-size miniPCIe + CompuLab FACE Module interface

Enclosure: Passively cooled die-cast aluminum

Dimensions: 16cm x 19cm x 3.7cm
